

global supply chain solutions

D log is a modern business operating in **the field of national and international transport and logistics.**

We provide solutions for sea, land and air shipments, customs operations, bonded and tax warehouse management, as well as logistics management of goods for third parties using our own warehouses and those of our partners.

Having offices at the port of Naples and maintaining collaborative relations with all the main Italian ports, D log is able to organize and create connections to and from everywhere in the world.

Our aim is to offer top transport solutions, a high-quality customized service with JIT delivery due to our fast dispatch of customs and logistics operations.

Optimization of the whole corporate supply chain is our goal, obtained by avoiding bottlenecks and providing highly efficient logistical and managerial solutions.

D-LOG

global supply chain solutions

SHIPMENT BY AIR

D log collaborates with operators and airlines of primary importance, offering transport services to and from any destination in the world. We can handle your shipments, whether by air consolidation services or through direct flights, we supply whatever our customers need. D log can also offer combined sea-air solutions, so that customers can enjoy the full benefits of shipping both more economically by sea and more speedily by air.

PORT AND BONDED WAREHOUSES AND LOGISTICS

D log runs an efficient logistics department, fully equipped to store cargo before its final delivery. Our covered and open-air warehouses are able to accommodate different categories of cargo: palletized, bulk, dry foods and hazardous.

We offer our customers container storage space in buildings near the entry ports (Naples, Salerno, Civitavecchia, Gaeta, Ravenna, Savona, Genoa, Manfredonia, Barletta).

The D log logistics division manages bonded and tax warehouses located in the ports of Genoa Voltri, Salerno, Gaeta, Civitavecchia and Naples.

SHIPMENT BY SEA

D log offers sea shipment services from all Italian ports to all major ports worldwide, placing at your disposal dry van (box), high cube, open top, flat rack, wide body, reefer and bulk containers (conventional cargo, FCL, LCL). Our network of partners and colleagues at destination ports combined with our long-lasting relationships with leading ship owners means we can negotiate freight rates and detention & demurrage charges that work in our customers' favour.

SHIPMENT BY LAND AND EXCEPTIONAL TRANSPORT

D log operates in the field of shipments and transport by land using high-class specialist suppliers in this sector.

Every day we move huge quantities of cargo all over Europe: standard, groupage, ADR, bulk, ATP and silos; we offer vast know-how in transports of exceptional shape and weight.

We can provide multimodal solutions by train with all the advantages in terms of environmental impact and transport costs.

PROJECT AND OVERSIZE

D log has broad knowledge of the logistical management of large-scale projects, such as oversize and overweight cargo. We can offer exceptional door-to-door transport with direct supervision of loading and unloading operations. According to customer requirements and after carrying out a preliminary feasibility study, we can set up solutions with FOB or full vessel service.

D log supports its customers in all aspects of transport: route surveys, the creation of ad hoc packing and crates, lashing and processing, customs procedures and risk evaluation and cover.

CUSTOMS SECTION

Our dedicated customs department offers fast, efficient and professional service in the handling of customs matters and associated operations by means of an EDI computerized system, which can immediately obtain all necessary documents for the import /export of freight.

WORLD WIDE NETWORK

Thanks to our vast network of worldwide contacts, D log is the ideal partner when you wish to internationalize your company through door-to-door services from one continent to another.

RISK ASSESSMENT AND COVERAGE

D log uses primary insurance companies in order to assess the risks in any individual logistical action such as: transport, storage, handling and processing, offering the best solution in terms of risk management.

TEAM

D log's driving force is in its people, its individuals, their character, their ability to work as a team when faced by problems, achieving set targets to the satisfaction of both our customers and our staff.

MISSION

To supply reliable and competent logistical solutions, which will enable global transport in any form to go anywhere in the world.

We can supply complete and reliable solutions, supporting you through the development strategies of your business and placing all our know-how at your disposal.

PASSION

D log's true nature is found in the passion of all the people who work there. The skills of the people working at D log, together with their wish to do well, form the driving force that creates value for the whole team.

ETHICS

Ethics is one of D log's keystones; since its inception, we have shared principles of honesty, transparency, integrity, loyalty and confidentiality with the people coming into contact with us. Genuine wealth is created when all the stakeholders are happy, be they employees, customers, environment, or the local communities that have welcomed us.

VALUES

RENEWAL

D log looks to the future, its gaze fixed on evolution and innovation in a spirit of purpose and adaptation, with ideas and flexibility contributed by everyone.

SKILLS

D log has built its success on skills acquired over time and based on a thirst for knowledge that is part of our daily lives. We aim to reach optimal results through a system of honing the skills available to the company and meeting staff requirements for training, security and the health and safety of their workplace.
